

HANDS ON HARPS

HANDS ON HARPS

Sustainable manufacturing

Hands on Harps joined Zellar in 2022 thanks to a SSE Energy Solutions-sponsored licence programme.

Since starting its sustainability journey Hands on Harps has installed green technology, completed energy checks and supported environmental projects resulting in a reduction in its energy usage, bills and CO₂ emissions.

9%

ENERGY REDUCTION

Through implementing behavioural changes in Zellar

£165

COSTS SAVED

Lower bills as a result of reducing energy consumption

10%

ANNUAL CO₂ SAVINGS

Taking demonstrable leaps towards net zero

HANDS ON HARPS

TESTIMONIAL

"We were already trying to make our business as green as we could, but with support from Zellar that has become easier and more effective. As well as the practical advice from the hands-on and knowledgeable team, we also now have the visible credentials that we can share with our customers, which is also important to us.

With the guidance of Zellar we're diving deeper into our supply chain to make the best decisions we can there and are working towards net zero."
